	TOPIC	PAYLOAD	REPLY
PWM	to-client/<ADDRESS>/pwm/<PIN>/<FREQUENCY>	<DUTYCYCLE>	None
ADC	to-client/<ADDRESS>/adc/<PIN>	None	Decimal voltage level on pin
GPIO set	to-client/<ADDRESS>/gpio/<PIN>	<STATUS>	None
GPIO read	to-client/<ADDRESS>/gpio/<PIN>/?	None	Digital level 0 or 1
UART send	to-client/<ADDRESS>/uart	<DATA>	None

<ADDRESS>	Client address which is defined with resistors R1 to R4 on the board 11,12,13,14,15,51,52,53,54
<PIN>	Pin number 2,3,4,5 (for adc) and 15,18,19,20,21,22 (for pwm and gpio)
<FREQUENCY>	integer value between 1 and 1000000
<DUTYCYCLE>	integer value between 0 and 100
<STATUS>	0 or 1
<DATA>	string of characters
